Product: Cefixime Dispersible Tablets IP 100 mg
Generic name: Cefixime Trihydrate
Batch No: CFX-4472
Mfg date: 02/2026 Exp date: 01/2028
Quantity supplied: 84,000 tablets (2,800 packs)
Quantity affected: 27 tablets across 9 blister strips
Country of distribution: United Kingdom

COMPLAINT DESCRIPTION

During routine goods-in inspection at our Manchester depot on 11 July 2026, our warehouse QA technician identified visible black particulate matter embedded in the surface of dispersible tablets in nine separate blister strips drawn from three different cartons of batch CFX-4472. The particles measure approximately 0.5 to 1.5 mm and are firmly embedded rather than surface deposits. Two of the affected strips also show slight brown discolouration at the tablet edge.

This product is dispensed to a paediatric population. One community pharmacy has reported that a parent returned an opened pack after noticing dark specks; no adverse reaction has been reported by the patient and no medical attention was sought. The remaining stock of batch CFX-4472 at our depot (2,640 packs) has been placed on quarantine hold pending your response. Complaint samples have been retained and are available for return under controlled conditions.

We note that batch CFX-4471 supplied in the same shipment has not shown the defect on inspection of 40 packs.

REQUESTED ACTION

Acknowledgement within 2 working days and a written investigation response within 30 calendar days per the Quality Agreement, Annexure 4.
